GLOBAL HEALTHSPAN POLICY INSTITUTE

Hello,

This week we learn how environmental pollutants could accelerate some signs of aging, how stem cell treatments could alleviate age related muscle decline and we learn how the colorful clownfish could be linked to future research into the aging process. On top of all that, we get a look at some of the science behind the current longevity movement.

Before you go, don't forget to check out the list of upcoming conferences and events in the world of aging research. You'll see events updated every week, so keep checking in!

Are you part of a health or life extension research organization? Our coalition has grown to over 90 member groups, including 25 major US organizations and 16 major international groups. We hope your organization will be next! Check below to find a link to join our coalition quickly and easily.

All this and more this week. Join us as we move forward into another exciting month of incredible opportunities in this burgeoning and revolutionary field.

GHPI Coalition Grows to Over 90 Members

Our coalition includes 25 major US organizations and 16 major international organizations. Will yours be next?

By joining the coalition you get access to the GHPI fellows, top experts in aging research. You gain more influence over national and world events. You are invited to our pilot projects. You get access to healthspan investment funds and our ability to promote your achievements. You get news updates, and can join our weekly coordinating call that steers the future of the healthspan movement.

Join The Coalition Here

We're Bringing the Best Research in the World to Congress - and Your Donations Are The Fuel To Our Fire!

With your help, we're bringing the vision of a world without the spectre of diseases like cancer, heart disease, and Alzheimer's one step closer to reality each and every day. Our team works closely with industry leaders from sectors as far-reaching as biotechnology to gene therapy to pharmaceuticals and beyond – uniting our members under a common, core mission to benefit the public trust.

Help us bring new preventions and therapeutics for the benefit of all generations, today

All Call For Volunteers For Healthier, More Productive Years of Life!

What if the US Congress took the lead funding healthspan research? Or by removing barriers to treatments to new therapeutics that can prevent diseases like cancer?

For the first time governments seem to be

Boosting muscle stem cells to treat muscular dystrophy and aging muscles

Researchers have uncovered new potential methods for using stem cells to treat muscular dystrophy and age related muscle decline

Upcoming Events

Harvard/Paul F. Glenn Symposium on Aging
May 20
Boston, MA, USA

The Mitochondrial Biogenesis and Dynamics in Health and Disease Conference
May 19-24
Palm Springs, CA, USA

American Aging Association 48th Annual Meeting
May 30 - June 2
Burlingame, CA, USA

The Protein Aggregation Conference: From Structure to In Vivo Sequelae
June 9 - 14
Snowmass Village, CO, USA
