

GLOBAL HEALTHSPAN POLICY INSTITUTE

Hello,

This week we hear from GHPI Fellow David Sinclair, in an interview with the Harvard Gazette, about new non-profit work and how he hopes to see life extension research impact the world. We also get new insight into the potential investment opportunities surrounding life extension research.

Additionally, we get a look at new research that could use stem cells to advance regenerative medicine and learn about a new stem cell based treatment that may be able to extend the treatment window for stroke victims.

Before you go, don't forget to check out the list of upcoming conferences and events in the world of aging research. You'll see events updated every week, so keep checking in!

Are you part of a health or life extension research organization? Our coalition has grown to over 90 member groups, including 25 major US organizations and 16 major international groups. We hope your organization will be next! Check below to find a link to join our coalition quickly and easily.

All this and more this week. Join us as we move forward into another exciting month of incredible opportunities in this burgeoning and revolutionary field.

Our coalition includes 25 major US organizations and 16 major international organizations. Will yours be next?

By joining the coalition you get access to the GHPI fellows, top experts in aging research. You gain more influence over national and world events. You are invited to our pilot projects. You get access to healthspan investment funds and our ability to promote your achievements. You get news updates, and can join our weekly coordinating call that steers the future of the healthspan movement.

We're Bringing the Best Research in the World to Congress - and Your Donations Are The Fuel To Our Fire!

With your help, we’re bringing the vision of a world without the spectre of diseases like cancer, heart disease, and Alzheimer’s one step closer to reality each and every day. Our team works closely with industry leaders from sectors as far-reaching as biotechnology to gene therapy to pharmaceuticals and beyond – uniting our members under a common, core mission to benefit the public trust.

[Help us bring new preventions and therapeutics for the benefit of all generations, today](#)

All Call For Volunteers For Healthier, More Productive Years of Life!

What if the US Congress took the lead funding healthspan research? Or by removing barriers to treatments to new therapeutics that can prevent diseases like cancer?

For the first time governments seem to be listening -- and you can help!

GHPI needs volunteers to engage with the public and ally nonprofit groups around the

Major stem cell discovery to boost research into development and regenerative medicine

New research into stem cells may lead to advancements in regenerative medicine
