GLOBAL HEALTHSPAN POLICY INSTITUTE

Hello,

This holiday week we look at new research into the evolution of aging throughout multiple species. We also learn how AI is helping researchers understand more of the aging process than ever before.

On top of that we get a look at a financial forecast for the next five years of the anti-aging marketplace and we learn how practicing kindness can be good for our health and slow down the aging process.

Before you go, don't forget to check out the list of upcoming conferences and events in the world of aging research. You'll see events updated every week, so keep checking in!

Are you part of a health or life extension research organization? Our coalition has grown to over 90 member groups, including 25 major US organizations and 16 major international groups. We hope your organization will be next! Check below to find a link to join our coalition quickly and easily.

All this and more this week. Join us as we move forward into another exciting month of incredible opportunities in this burgeoning and revolutionary field.

We're Bringing the Best Research in the World to Congress - and Your Donations Are The Fuel To Our Fire!

With your help, we're bringing the vision of a world without the spectre of diseases like cancer, heart disease, and Alzheimer's one step closer to reality each and every day. Our team works closely with industry leaders from sectors as far-reaching as biotechnology to gene therapy to pharmaceuticals and beyond – uniting our members under a common, core mission to benefit the public trust.

All Call For Volunteers For Healthier, More Productive Years of Life!

What if the US Congress took the lead funding healthspan research? Or by removing barriers to treatments to new therapeutics that can prevent diseases like cancer?

For the first time governments seem to be listening -- and you can help!

GHPI needs volunteers to engage with the public and ally nonprofit groups around the world.

Global Anti-Aging Market Outlook 2019-2024: Historical, Current & Future Market Trends and Key Drivers & Success Factors

The global anti-aging market grew to over \$50 Billion in 2018, and is projected to exceed \$79 Billion by 2024.
