Hello,

This week we learn about new research linking cellular senescence to blood clots, get a preview of a presentation from NIA Director Richard J. Hodes, and learn how financial hardships may be linked to accelerated aging.

We also get a look at an informative video from NPR featuring GHPI Fellow David Sinclair.

Before you go, don't forget to check out the list of upcoming conferences and events in the world of aging research. You'll see events updated every week, so keep checking in!

Are you part of a health or life extension research organization? Our coalition has grown to over 90 member groups, including 25 major US organizations and 16 major international groups. We hope your organization will be next! Check below to find a link to join our coalition quickly and easily.

All this and more this week. Join us as we move forward into another exciting month of incredible opportunities in this burgeoning and revolutionary field.

Edwina Rogers, CEO Global Healthspan Policy Institute

GHPI Coalition Grows to Over 90 Members

Cellular senescence is associated with age-related blood clots

For the first time, senescent cells, long associated with the aging process, have been linked to blood clots. This new research was conducted at the Buck Institute by GHPI Fellow Judith Campisi and her team.

organizations and 16 major international organizations. Will yours be next?

By joining the coalition you get access to the GHPI fellows, top experts in aging research. You gain more influence over national and world events. You are invited to our pilot projects. You get access to healthspan investment funds and our ability to promote your achievements. You get news updates, and can join our weekly coordinating call that steers the future of the healthspan movement.

Join The Coalition Here

We're Bringing the Best Research in the World to Congress - and Your Donations Are The Fuel To Our Fire!

With your help, we're bringing the vision of a world without the spectre of diseases like cancer, heart disease, and Alzheimer's one step closer to reality each and every day. Our team works closely with industry leaders from sectors as far-reaching as biotechnology to gene therapy to pharmaceuticals and beyond – uniting our members under a common, core mission to benefit the public trust.

Help us bring new preventions and therapeutics for the benefit of all generations, today

All Call For Volunteers For Healthier, More Productive Years of Life!

What if the US Congress took the lead funding healthspan research? Or by removing barriers to treatments to new therapeutics that can prevent diseases like cancer?

For the first time governments seem to be listening -- and you can help!

GHPI needs volunteers to engage with the public and ally nonprofit groups around the world.

Watch a new NPR video on longevity and healthspan research featuring GHPI Fellow David Sinclair

Watch

Financial hardship may accelerate aging

People have often joked that financial stress can cause gray hair, but it turns out there may be a lot more to it than that.
