# GLOBAL HEALTHSPAN POLICY INSTITUTE

Hello,

This week we learn about new studies around a new CRISPR treatment for heart disease and another that examines how skin microbes can predict our age. We also hear from GHPI Fellow Judith Campisi on a new study on senescence and neurodegeneration.

Additionally, as budget talks heat up in Washington, initial calls have come through from the White House for a 7% cut to the NIH budget. Learn all about that situation, which we'll surely be watching in the coming days and weeks.

Before you go, don't forget to check out the list of upcoming conferences and events in the world of aging research. You'll see events updated every week, so keep checking in!

Are you part of a health or life extension research organization? Our coalition has grown to over 90 member groups, including 25 major US organizations and 16 major international groups. We hope your organization will be next! Check below to find a link to join our coalition quickly and easily.

All this and more this week. Join us as we move forward into another exciting month of incredible opportunities in this burgeoning and revolutionary field.

Edwina Rogers, CEO  
Global Healthspan Policy Institute

**GHPI Coalition Grows to Over 90 Members**

### **Trump requests 7% cut in NIH budget**

As of now, Congress is not expected to go along with the proposed cuts, but we'll be sure to keep an eye on the situation.

Our coalition includes 25 major US organizations and 16 major international organizations. Will yours be next?

By joining the coalition you get access to the GHPI fellows, top experts in aging research. You gain more influence over national and world events. You are invited to our pilot projects. You get access to healthspan investment funds and our ability to promote your achievements. You get news updates, and can join our weekly coordinating call that steers the future of the healthspan movement.

### **We're Bringing the Best Research in the World to Congress - and Your Donations Are The Fuel To Our Fire!**

With your help, we're bringing the vision of a world without the spectre of diseases like cancer, heart disease, and Alzheimer's one step closer to reality each and every day. Our team works closely with industry leaders from sectors as far-reaching as biotechnology to gene therapy to pharmaceuticals and beyond – uniting our members under a common, core mission to benefit the public trust.

[Help us bring new preventions and therapeutics for the benefit of all generations, today](#)

### **All Call For Volunteers For Healthier, More Productive Years of Life!**

What if the US Congress took the lead funding healthspan research? Or by removing barriers to treatments to new therapeutics that can prevent diseases like cancer?

For the first time governments seem to be listening -- and you can help!

GHPI needs volunteers to engage with the public and ally nonprofit groups around the world.

## Researchers discover how cellular senescence leads to neurodegeneration

GHPI Fellow Judith Campisi discusses new research that shows how cellular senescence leads to neurodegeneration

## Upcoming Events

[Keystone Symposium](#)

[Intra- and Intercellular Mechanisms of Aging \(B2\)](#)

February, 9-13

Vancouver, BC, Canada

[International Conference on Frailty and Sarcopenia Research](#)

March 11-13

Toulouse, France

[Experimental Biology 2020](#)

April 4-7

San Diego, CA, USA

[Longevity Leaders World Conference](#)

April 21-22

London, UK
