

Global Healthspan Policy Institute

[View this email in your browser](#)

Hello,

This week we learn about a new scholars' program from the NIA, a new aging research institute from UC San Francisco and get some analysis on what we might expect from the Biden administration when it comes to life science and aging research funding. We also get an interesting overview of the science of life extension from WebMD, featuring quotes from GHPI Fellow Dr. Jay Olshansky.

Are you part of a health or life extension research organization? Our coalition has grown to over 90 member groups, including 25 major US organizations and 16 major international groups. We hope your organization will be next! Check below to find a link to join our coalition quickly and easily.

All this and more this week. Join us as we move forward into another exciting month of incredible opportunities in this burgeoning and revolutionary field.

All Call For Volunteers For Healthier, More Productive Years of Life!

What if the US Congress took the lead funding healthspan research? Or by removing barriers to treatments to new therapeutics that can prevent diseases like cancer?

For the first time governments seem to be listening -- and you can help!

GHPI needs volunteers to engage with the public and ally nonprofit groups around the world.
