Hello,

This week we learn about new research that could lead to the recovery of damaged, aging neurons in aging brains, as well as a new method to fight osteoarthritis with artificial cartilage that produces its own anti-inflammatory compounds.

We also learn how light activities could increase mobility for older women and how it may be more important than previously thought to incorporate research into social behaviors alongside biological research when developing aging therapies.

Are you part of a health or life extension research organization? Our coalition has grown to over 90 member groups, including 25 major US organizations and 16 major international groups. We hope your organization will be next! Check below to find a link to join our coalition quickly and easily.

All this and more this week. Join us as we move forward into another exciting month of incredible opportunities in this burgeoning and revolutionary field.

Edwina Rogers, CEO
Global Healthspan Policy Institute

Reactivating aging stem cells in the brain

Researchers at the University of Zurich may have discovered a way to reactivate the production of neurons in the aging brain.

Engineered cartilage produces anti-inflammatory drug

New research, funded in part by the NIH, has developed a potential method to engineer replacement cartilage that produces its own anti-inflammatory molecules.

Three studies emphasize how behavioral and social factors are intrinsic to aging

Multiple new studies indicate that it's necessary to incorporate behavioral & social science alongside biological studies when developing therapies to slow aging.

GHPI Coalition Grows to Over 90 Members

Our coalition includes 25 major US organizations and 16 major international organizations. Will yours be next?

By joining the coalition you get access to the GHPI fellows, top experts in aging research. You gain more influence over national and world events. You are invited to our pilot projects. You get access to healthspan investment funds and our ability to promote your achievements. You get news updates, and can join our weekly coordinating call that steers the future of the healthspan movement.

We're Bringing the Best Research in the World to Congress - and Your Donations Are The Fuel To Our Fire!

With your help, we're bringing the vision of a world without the spectre of diseases like cancer, heart disease, and Alzheimer's one step closer to reality each and every day. Our team works closely with industry leaders from sectors as far-reaching as biotechnology to gene therapy to pharmaceuticals and beyond – uniting our members under a common, core mission to benefit the public trust.

[Help us bring new preventions and therapeutics for the benefit of all generations, today](#)

All Call For Volunteers For Healthier, More Productive Years of Life!

What if the US Congress took the lead funding healthspan research? Or by removing barriers to treatments to new therapeutics that can prevent diseases like cancer?

For the first time governments seem to be listening -- and you can help!

GHPI needs volunteers to engage with the public and ally nonprofit groups around the world.

Contact dcarver@healthspanpolicy.org to join the tiger team today!
