[View this email in your browser](#)

Hello,

This week we learn about new research into aging muscle cells that will take place on the International Space Station, and another study that will examine the impact of air quality on our health as we age. We also learn how a good education might yield positive effects on the aging brain and get a look at a study that examines how and why lesions that cause cognitive decline form on the brain.

Are you part of a health or life extension research organization? Our coalition has grown to over 90 member groups, including 25 major US organizations and 16 major international groups. We hope your organization will be next! Check below to find a link to join our coalition quickly and easily.

All this and more this week. Join us as we move forward into another exciting month of incredible opportunities in this burgeoning and revolutionary field.

#### Human muscle cells to be launched into space for aging research

Spending time in zero gravity makes astronauts' muscles get weaker, just like in old age. These new experiments aim to learn exactly why, in an effort to develop treatments that can help counter those effects on Earth.

#### Exposome study seeks to link lifelong pollutant exposure to onset of age-related diseases

The new experiment, by the University of Utah aims to explore the effects of air quality on aging and age-related conditions over time.

#### Academic education can have a positive influence on brain aging

A new study shows that academic education may reduce some age-related neurodegenerative conditions.

#### Wear and Tear in Vulnerable Brain Areas Lead to Lesions Linked to Cognitive Decline in Aging

Researchers at Stevens Institute of Technology have developed a better understanding of how and why lesions that affect cognitive decline develop in the aging brain.

#### GHPI Coalition Grows to Over 90 Members

Our coalition includes 25 major US organizations and 16 major international organizations. Will yours be next?

By joining the coalition you get access to the GHPI fellows, top experts in aging research. You gain more influence over national and world events. You are invited to our pilot projects. You get access to healthspan investment funds and our ability to promote your achievements. You get news updates, and can join our weekly coordinating call that steers the future of the healthspan movement.

#### We're Bringing the Best Research in the World to Congress - and Your Donations Are The Fuel To Our Fire!

With your help, we're bringing the vision of a world without the spectre of diseases like cancer, heart disease, and Alzheimer's one step closer to reality each and every day. Our team works closely with industry leaders from sectors as far-reaching as biotechnology to gene therapy to pharmaceuticals and beyond – uniting our members under a common, core mission to benefit the public trust.

[Help us bring new preventions and therapeutics for the benefit of all generations, today](#)

#### All Call For Volunteers For Healthier, More Productive Years of Life!

What if the US Congress took the lead funding healthspan research? Or by removing barriers to treatments to new therapeutics that can prevent diseases like cancer?

For the first time governments seem to be listening -- and you can help!

GHPI needs volunteers to engage with the public and ally nonprofit groups around the world.

Contact [dcarver@healthspanpolicy.org](mailto:dcarver@healthspanpolicy.org) to join the tiger team today!

#### ***Upcoming Events***

Due to the ongoing COVID-19 Pandemic events are very limited. As new ones are publicized, we will include them here.
