

Hello,

This week we learn how new treatments for inflammation could positively impact anti-aging research, about new guidance on hormone replacement therapies and we hear about more new guidance from the AMA on measuring healthy weight. We also hear about a new obesity drug that is showing positive results for patients with heart disease and diabetes.

Are you part of a health or life extension research organization? Our coalition has grown to over 90 member groups, including 25 major US organizations and 16 major international groups. We hope your organization will be next! Check below to find a link to join our coalition quickly and easily.

All this and more this week. Join us as we move forward into another exciting month of incredible opportunities in this burgeoning and revolutionary field.

Edwina Rogers, CEO
Global Healthspan Policy Institute
