

Hello,

This week we learn how Vitamin D can provide cognitive benefits, how the world's oldest rats are contributing to aging research and how shifting focuses in research could lead to more progress in longevity research. We also meet some of the leading minds in the field, including GHPI fellow David Sinclair.

Are you part of a health or life extension research organization? Our coalition has grown to over 90 member groups, including 25 major US organizations and 16 major international groups. We hope your organization will be next! Check below to find a link to join our coalition quickly and easily.

All this and more this week. Join us as we move forward into another exciting month of incredible opportunities in this burgeoning and revolutionary field.

Edwina Rogers, CEO
Global Healthspan Policy Institute

We're Bringing the Best Research in the World to Congress - and Your Donations Are The Fuel To Our Fire!

With your help, we're bringing the vision of a world without the spectre of diseases like cancer, heart disease, and Alzheimer's one step closer to reality each and every day. Our team works closely with industry leaders from sectors as far-reaching as biotechnology to gene therapy to pharmaceuticals and beyond – uniting our members under a common, core mission to benefit the public trust.

[Help us bring new preventions and therapeutics for the benefit of all generations, today](#)
