Hello,

This week we learn how certain HIV drugs could fight Alzheimer's, how swapping out table salt for a substitute could drastically improve heart health and we see yet another study pointing to the longevity benefits of Metformin. We also learn about an innovative new treatment for diseases that lead to poor gut health, like liver cirrhosis.

Are you part of a health or life extension research organization? Our coalition has grown to over 90 member groups, including 25 major US organizations and 16 major international groups. We hope your organization will be next! Check below to find a link to join our coalition quickly and easily.

All this and more this week. Join us as we move forward into another exciting month of incredible opportunities in this burgeoning and revolutionary field.
