

Hello,

This week we learn how vitamin B deficiencies could contribute to Parkinson's disease and the 9 things people have in common in "Blue zones", that contribute to their longer lifespans. We also learn about two exciting new conferences happening in Tokyo and Israel before the end of the year.

Are you part of a health or life extension research organization? Our coalition has grown to over 90 member groups, including 25 major US organizations and 16 major international groups. We hope your organization will be next! Check below to find a link to join our coalition quickly and easily.

All this and more this week. Join us as we move forward into another exciting month of incredible opportunities in this burgeoning and revolutionary field.
