Hello,

This week we learn how olive oil can help reduce dementia risk, how stem cells grown in space have unique qualities that could lead to new therapies and how researchers hope to fight aggressive cancers with a new treatment. We also get a look at longevity research from the NIA.

Are you part of a health or life extension research organization? Our coalition has grown to over 90 member groups, including 25 major US organizations and 16 major international groups. We hope your organization will be next! Check below to find a link to join our coalition quickly and easily.

All this and more this week. Join us as we move forward into another exciting month of incredible opportunities in this burgeoning and revolutionary field.
