Hello,

This week we learn how the shingles vaccine could prevent dementia, how CT scans may increase cancer risk, and how microplastics may impact how fast we age. We also learn about the future of aging research from Cedars-Sinai.

Are you part of a health or life extension research organization? Our coalition has grown to over 90 member groups, including 25 major US organizations and 16 major international groups. We hope your organization will be next! Check below to find a link to join our coalition quickly and easily.

All this and more this week. Join us as we move forward into another exciting month of incredible opportunities in this burgeoning and revolutionary field.
