Hello,

This week we learn about surprising insights into aging and health. Dementia risk is up to 25% higher in parts of the American South, and Florida ranks worst for aging in place. Scientists explore a potential cellular switch to reverse type 2 diabetes, while experimental blood “washing” treatments for aging show early promise but raise questions.

Are you part of a health or life extension research organization? Our coalition has grown to over 90 member groups, including 25 major US organizations and 16 major international groups. We hope your organization will be next! Check below to find a link to join our coalition quickly and easily.

All this and more this week. Join us as we move forward into another exciting month of incredible opportunities in this burgeoning and revolutionary field.
