GLOBAL HEALTHSPAN POLICY INSTITUTE

Hello,

This week we learn about possible bacterial triggers for heart attacks, a fast-acting eye drop for improving vision in older adults, how dancing may combat aging, and whether daily cocoa extract supplements can curb age-related inflammation and heart disease.

Are you part of a health or life extension research organization? Our coalition has grown to over 90 member groups, including 25 major US organizations and 16 major international groups. We hope your organization will be next! Check below to find a link to join our coalition quickly and easily.

All this and more this week. Join us as we move forward into another exciting month of incredible opportunities in this burgeoning and revolutionary field.

Edwina Rogers, CEO

Heart Attacks May Be Linked to Bacterial Infections

Some bacterial infections might provoke inflammation or vascular stress that can act as acute triggers for heart attacks—even among people without evident cardiovascular disease.

We're Bringing the Best Research in the World to Congress - and Your Donations Are The Fuel To Our Fire!

With your help, we're bringing the vision of a world without the spectre of diseases like cancer, heart disease, and Alzheimer's one step closer to reality each and every day. Our team works closely with industry leaders from sectors as far-reaching as biotechnology to gene therapy to pharmaceuticals and beyond – uniting our members under a common, core mission to benefit the public trust.

[Help us bring new preventions and therapeutics for the benefit of all generations, today.](#)[Join The Coalition Here](#)

New Eye Drops Sharpen Aging Eyes in Just One Hour

A novel formula improves visual clarity in older adults within an hour—offering a promising non-invasive method to counter age-related decline in vision.

Daily Cocoa Extract Supplements May Help Prevent Age-Related Heart Disease

In a new study, older adults who took 500 mg of cocoa extract daily showed reductions in inflammatory markers (notably hsCRP) over two years, suggesting a role for cocoa flavanols in slowing “inflammaging” and protecting cardiovascular health.
