Hello,

This week, we explore breakthroughs in aging and disease prevention. From mRNA vaccines tackling cancer to immune cells clearing out aging ones, the future of health looks promising — if we can close the gap between science and public understanding.

Are you part of a health or life extension research organization? Our coalition has grown to over 90 member groups, including 25 major US organizations and 16 major international groups. We hope your organization will be next! Check below to find a link to join our coalition quickly and easily.

All this and more this week. Join us as we move forward into another exciting month of incredible opportunities in this burgeoning and revolutionary field.

mRNA COVID-19 Vaccines Could Unlock the Next Revolution in Cancer Treatment

New research suggests that mRNA vaccines — like those developed for COVID-19 — may help “re-train” the immune system to better recognize and attack cancer cells, potentially transforming how some cancers are treated.

Americans Have Widespread Misbeliefs About the Cancer Risks of mRNA Vaccines

Despite emerging evidence of potential cancer-fighting benefits, many Americans continue to believe incorrectly that mRNA vaccines raise cancer risk — highlighting a substantial disconnect between current science and public perception.

Scientists Discover Immune Cells That May Slow Aging — Could Extend Immune Healthspan

A newly identified subset of T helper cells appears to help the body clear senescent (aged or damaged) cells — a process linked to slower biological aging. This finding could pave the way toward therapies that preserve immune function and overall health as we age.

New Large-Scale Dataset Released to Map Healthy Cognitive Aging Across the Lifespan

The Precision Aging Network has just publicly released the first four years of its comprehensive dataset on normal cognitive aging — giving researchers worldwide unprecedented access to data that may help unlock why some people retain strong memory and brain function into old age.

We're Bringing the Best Research in the World to Congress - and Your Donations Are The Fuel To Our Fire!

With your help, we're bringing the vision of a world without the spectre of diseases like cancer, heart disease, and Alzheimer's one step closer to reality each and every day. Our team works closely with industry leaders from sectors as far-reaching as biotechnology to gene therapy to pharmaceuticals and beyond — uniting our members under a common, core mission to benefit the public trust.

[Help us bring new preventions and therapeutics for the benefit of all generations, today.](#)
