Hello,

This week we learn about extraordinary longevity revealed through DNA studies, promising progress toward a universal cancer vaccine, how weight-loss drugs reduce heart attack risk regardless of weight loss, and a roundup of stunning brain science discoveries from 2025.

Are you part of a health or life extension research organization? Our coalition has grown to over 90 member groups, including 25 major US organizations and 16 major international groups. We hope your organization will be next! Check below to find a link to join our coalition quickly and easily.

All this and more this week. Join us as we move forward into another exciting month of incredible opportunities in this burgeoning and revolutionary field.

#### DNA Study of a 117-Year-Old Woman Reveals Clues to Long Life

Scientists are analyzing the DNA of Maria Branyas Morera — who lived to 117 — to uncover genetic and biological factors that may contribute to extreme longevity and resistance to age-related diseases. The findings could provide insights into mechanisms of healthy aging.

#### Scientists Close In on a Universal Cancer Vaccine

Researchers have developed a nanoparticle-based vaccine that successfully prevented several aggressive cancers in mice — including pancreatic and melanoma — by training the immune system to recognize and attack cancer cells, marking a major step toward a universal cancer vaccine.

#### Weight-Loss Drug Cuts Heart Attack Risk No Matter How Many Kilograms Are Shed

A new study finds that cardiovascular benefits from certain weight-loss medications are seen even when participants lose only modest amounts of weight, suggesting heart protection effects go beyond simple weight reduction — potentially reshaping how these drugs are used in clinical care.

#### We're Bringing the Best Research in the World to Congress - and Your Donations Are The Fuel To Our Fire!

With your help, we're bringing the vision of a world without the spectre of diseases like cancer, heart disease, and Alzheimer's one step closer to reality each and every day. Our team works closely with industry leaders from sectors as far-reaching as biotechnology to gene therapy to pharmaceuticals and beyond — uniting our members under a common, core mission to benefit the public trust.

[Help us bring new preventions and therapeutics for the benefit of all generations, today.](#)
